Find below the coding that I have in place I am using Chilkat's activex to do the decoding.

pdf' For For Binary Access Write As 2 Select all When you write your data from the byte array returned by the DecryptBytesENC function you will need to write the bytes one-by-one in a loop to make sure that all the bytes written correctly.. I used a free online Base64 decoder () and cut/paste the string that is sent to me, and then used the option to save the file as a binary file.. However, when I go to save the file, it doesn't seem to open in pdf (recognizes it as a damaged file).. NET examples These are live examples that demonstrate various supported Word features in GemBox.
